

SPECIFIC ENVIRONMENTAL POLICY

The fundamental purpose of RIEUSSET's Environmental Policy, whose implementation responsibility lies with General Management, is the **care of the environment and eliminating or at least minimizing the impacts that its industrial activity generates on it.**

The objectives that have been set in order to achieve this are:

- Maintaining and continuously improving the **Environmental Management System** based on the ISO 14001 and FSC® (License nr FSC®C129717) Standards.

- Continuously improving **the training of staff** and their competencies in **environmental matters.**

- Developing an **effective communication system** with interested parties to publicize the activities that RIEUSSET does to preserve the environment and to promote this way of acting among them and collaborating with them.

- Complying with the applicable **legal and regulatory requirements**, as well as the **standards established** in the company, and carrying out systematic internal and external **audits** that verify the compliance and effectiveness of the defined procedures.

- Periodically reviewing our potential environmental impact** derived from the processes of our activity and **using indicators** to control their evolution.

- Introducing environmental considerations into our **decision-making.**

- Developing our activity according to the principle of the **circular economy.**

- Annually reducing the consumption of electricity, gas, and water by 5%** in relation to the production carried out.

- Consuming electricity generated **only** from **sources of renewable origin.**

- Working towards making our products 50% **recyclable** by 2025.

- Revising the environmental policy** annually.
