

SPECIFIC ENVIRONMENTAL POLICY

The fundamental purpose of RIEUSSET's Environmental Policy, whose implementation responsibility lies with General Management, is the **care of the environment and eliminating** or at least **minimizing the impacts that its industrial activity** generates on it.

The objectives that have been set in order to achieve this are:

-Maintaining and continuously improving the **Environmental Management System** based on the ISO 14001 and FSC® (License nr FSC®C129717) Standards.

-Continuously improving **the training of staff** and their competencies in **environmental matters**.

-Developing an **effective communication system** with interested parties to publicize the activities that RIEUSSET does to preserve the environment and to promote this way of acting among them and collaborating with them.

-Complying with the applicable **legal and regulatory requirements**, as well as the **standards established** in the company, and carrying out systematic internal and external **audits** that verify the compliance and effectiveness of the defined procedures.

-**Periodically reviewing our potential environmental impact** derived from the processes of our activity and **using indicators** to control their evolution.

-Introducing environmental considerations into our **decision-making**.

-Developing our activity according to the principle of the **circular economy**.

-**Annually reducing the consumption of electricity, gas, and water by 5%** in relation to the production carried out.

-Working towards making our products **50% recyclable** by 2025.

-**Revising the environmental policy** annually.
